- Format: Hardback
- Pagination: 184 pages, 136M.
- Dimensions: 285 x 224 mm
- Country of Pub.: United Kingdom
- Pub Date: 30/04/2006
- Price: 19,43 €

Description:

A new edition of Britain's best-selling secondary school atlas, Philip's Modern School Atlas is divided into sections for ease of use, with each page colour-coded for rapid reference. An 11-page Remote Sensing section covers such topics as satellite imagery and GIS (with an explanation of false-colour usage), incorporating a selection of images used in studies of exploration, land reclamation, erosion, geology and pollution, with explanatory text. The next section covers the British Isles in 32 pages.

With physically coloured maps, this is the most accurate mapping of the British Isles available at the chosen scales. Accompanying the physical maps are thematic maps of the British Isles on numerous key social and economic themes. The middle section is made up of 74 pages of World topographical maps, incorporating continental thematic maps on topics such as climate, population and economics, followed by 30 pages of World thematic maps.

Completing the atlas is a section of World social and economic statistics, accompanied by the index to the topographical maps in the atlas, showing letter-figure grid references as well as latitude and longitude co-ordinates. Philip's Modern School Atlas is an unbeatable combination of highly detailed physical mapping backed up by numerous tables and thematic maps.

Description:

Completely new and extended edition of the best-selling Collins Student Atlas. Created specifically for Key Stage 4 students, and a vital tool for all students. Collins Student World Atlas has been specifically designed for students aged 14-16 years, however its well-researched uncluttered design makes it suitable for all students.

This third edition has been extensively revised, updated and extended to include a dictionary of geographical terms. It features up-to-date reference and thematic mapping, mapping skills, country-by-country statistics and a fully comprehensive index to all names appearing on reference maps. Thematic maps and accompanying graphs and tables adhere strictly to the National Curriculum guidelines and cover topics such as Tourism, Telecommunications, Environmental and socio-economic topics.

All maps have been fully updated using the latest statistical information available. The inclusion of a selective list of web addresses on each thematic page ensures students are motivated to explore more deeply into a topic. High quality satellite imagery, which has been selectively used within special topic or study areas, supports data on the maps and is used to illustrate key environmental issues. Extensive lists of statistics for demographic and socio-economic facts provide up-to-date data for students wishing to create their own

graphs to support individual geography, tourism, mathematics, economics or IT projects.

Included in this edition is a CD-ROM which introduces the subject of GIS, now a topic included in the Geography curriculum. The CD is produced in association ESRI, who design and develop the world's leading geographic information system (GIS) technology. It gives a broad overview of the importance of GIS and its use in everyday life by environmental agencies, the military, the police, emergency services, supermarkets etc.

Data and ESRI software included on the CD can be used by students to carry out exercises and activities contained in the CD.
